SUMMARY

Software Engineer with 5+ years of experience specializing in the design and delivery of scalable front-end and full-stack applications. Expert in the modern React ecosystem, including TypeScript, Redux Toolkit, and React Native. Skilled in building intuitive user interfaces, reusable component systems, and data flows that support maintainable, high-performance applications across web and mobile platforms.

WORK EXPERIENCE

Groupcation 2025 - Present

Software Engineer (Freelance)

- Led development of Groupcation, a collaborative travel planning platform built with React, TypeScript, Redux Toolkit, Supabase, and styled-components.
- Built reusable form systems and UI patterns to maintain consistency and scalability.
- Collaborated closely with design to refine user flows and deliver a fully responsive mobile-first interface.

Cengage Learning 2023 - 2024

Software Engineer

- Collaborated with the development team to implement new features using React and TypeScript, resolve bugs, and maintain the codebase.
- Worked on transforming JavaScript files to Typescript within the Cengage MindTap school platform, enhancing codebase agility and maintainability.
- Transitioned Enzyme tests to Jest and RTL, improving testing efficiency and ensuring the reliability of code changes

BrainDo LLC 2021 - 2023

Web Developer

- Worked with the development team to design, develop, and manage web and mobile applications for clients using React for web platforms and React Native for mobile.
- Managed multiple projects simultaneously, collaborating with teams to meet tight deadlines while maintaining high code quality and ensuring client satisfaction.
- Configured AWS endpoints for several projects using API Gateway and AWS Lambda, while also hosting multiple WordPress sites on AWS to ensure reliable performance and ease of management.

Freelance 2019 - 2021

Web Developer

- Created and managed a custom website for a restaurant in Philadelphia, showcasing the menu and promoting events to enhance customer engagement.
- Conceptualized and developed a CRUD application for a meal logging app that enables users to track and manage their favorite recipes, allowing for easy logging and organization of meals.
- Developed a range of personal side projects using React and frameworks such as Next.js, enabling me to explore various features and enhance my development skills.

EDUCATION

Liberal Arts 2011-2013

Community College of Philadelphia

SKILLS

Frontend: JavaScript, TypeScript, React, Redux Toolkit, React Native, HTML, CSS/SASS, Styled-Components, Next.js, WordPress, and Zustand

Backend & Infrastructure: Node.js, Supabase, Firebase, AWS (Lambda, API Gateway, Hosting), and Netlify
